TECHNICAL SKILLS

MOBILE DEVELOPMENT

- Flutter, Dart
- SwiftUI, Swift
- Android, iOS

STATE MANAGEMENT

- Riverpod, BLoC, Provider, GetX

ARCHITECTURE

- Clean Architecture, SOLID
- Repository Pattern

BACKEND & DATA

- REST APIs, Node.js
- Firebase (Auth, Firestore, FCM, Crashlytics)
- Hive, SQLite

TESTING & DEVOPS

- Unit & Widget Testing
- GitHub Actions CI/CD

APP STORES

- Google Play Console
- Apple App Store, TestFlight

PROFILE

Flutter developer with 1+ year of professional experience shipping production Android and iOS apps in healthcare, nutrition, and e-learning. Founding mobile engineer at Docwo, owning the mobile architecture and leading a 15+ member intern team. Strong in Clean Architecture, Riverpod/BLoC, Firebase, CI/CD, and testing.

WORK EXPERIENCE

Code-Ox Technologies LLP

OCTOBER 2025 - PRESENT

Junior Flutter Developer

- Shipped 4 production Flutter apps for Android and iOS: diet-subscription apps Feed, Diet Done and Planet Zero (plan purchase, daily meal selection) and ISA, an e-learning platform for scuba diving and spearfishing.
- Built a shared widget library and theming system reused across all 4 apps, cutting duplicated UI code and speeding up delivery.
- Set up GitHub Actions CI/CD for automated build, lint, test and distribution; integrated Firebase Auth, FCM, Crashlytics and REST APIs, with unit and widget tests.

Docwo

OCTOBER 2025 - PRESENT

Founding Mobile Engineer (Equity)

- Own the mobile department; architected the healthcare app from scratch with Clean Architecture, Riverpod, feature-first modules and a shared component library.
- Lead a cross-functional team of 15+ interns (Flutter, backend, QA, UI/UX): plan sprints, assign work, review code and enforce coding standards.

Spinecode Solutions

July 2025 – October 2025

Junior Flutter Developer

- Delivered features across 6+ client Flutter apps (e-learning, logistics, booking), integrating push notifications and third-party APIs in Agile sprints.

TOOLS

DEVELOPMENT

- Git, Postman
- Android Studio, Xcode, VS Code

DESIGN & MOTION

- Figma
- Lottie

KNOWLEDGE

MOBILE ARCHITECTURE

- Designing scalable Flutter apps with Clean Architecture, feature-first modules and shared component libraries.

TEAM LEADERSHIP

- Running sprints, code reviews and coding standards for a 15+ member cross-functional intern team.

DELIVERY & RELEASE

- Automated build, test and distribution with GitHub Actions; releases via TestFlight and Google Play Console.

EDUCATION

IGNOU

- Bachelor of Computer Applications (Pursuing) (2025 – Present)

PROJECTS

Docwo *Flutter · Riverpod*

Key Achievements : Launched a healthcare app on Google Play and the App Store as founding mobile engineer.

Product Architecture & Workflow : Built authentication, appointment management, patient profiles and real-time data flows on a Clean Architecture, feature-first codebase.

Goals : Give patients a fast, reliable way to book and manage appointments.

Multi-Tenant E-Learning Platform *Flutter · Node.js · In Progress*

Key Achievements : Built the backend and app solo — teachers sell video courses, and each teacher gets their own branded app.

Product Architecture & Workflow : Multi-tenant Node.js backend with authentication and payments, powering per-teacher branded Flutter apps and a live web dashboard.

Goals : Let independent teachers launch and monetise their own course app without building one.

Red Rose Dates *Flutter · Firestore · Freelance (Qatar)*

Key Achievements : Sole engineer on a sales management app now in daily use by the client.

Product Architecture & Workflow : Real-time order, billing and sales sync built on Flutter and Cloud Firestore.

Goals : Give the client's team live visibility into orders, billing and sales.

Finex *SwiftUI · iOS*

Key Achievements : Built and published a personal finance app to the App Store.

Product Architecture & Workflow : Native SwiftUI app on Clean Architecture with custom animated charts.

Goals : Make personal spending and savings easy to track at a glance.
